Tariffs for Commercial and Industrial Use

Tariffs for **Commercial and Industrial Use** are applicable to classes of customers whose economic activities are defined by the Statistical Codes of Economic Activities (NACE code of the European Union, Revision No. 2), employed by EAC, as Commercial or Agricultural or Industrial or Water-Pumping.

In activities such as **Commercial Use Tariffs**, electricity is solely used for Commercial purposes or for any other purposes related to commerce or profession. Electricity supply to churches, monasteries, hospitals, schools, boarding houses, hotels, hostels, clubs and similar premises, public or private buildings and establishments is also considered as of Commercial Use.

In activities related to **Industrial Use Tariffs**, electricity is used for the purpose of electromotive power or electrochemical or electrothermal processes in factories, workshops, foundries, mills, pumping stations or other industrial installations.

For the purpose of these tariffs, in case a question arises, whether the electricity supply is intended for any of the above mentioned purposes, EAC shall decide on the matter and its decision shall be final.

These tariffs are not applicable to electricity supplies for stand-by purposes.

NOTES

- (1) The Coefficient of Fuel Adjustment is revised on a six-month period basis, according to the Cyprus Energy Regulatory Authority's Decisions. Its current price is published on EAC's website.
- (2) In the case of premises with more than one occupier/customer, where a separate point of supply is provided for each occupier/customer, EAC shall charge for each point of supply separately.
- (3) When more than one point of supply is provided to a customer, EAC has the authority and right to apply the appropriate tariff to each point of supply.
- (4) Where to a point of supply, more than one tariff might be applicable, the bi-monthly or monthly customers are entitled to change their existing tariff to another alternative tariff after a minimum of six bi-monthly periods or twelve months respectively, have elapsed from the date when their premises are charged with the current tariff. A written notice (application) to that effect is required to be given to EAC.

EAC has the right to decide which of the tariffs are applicable to any point of supply and any type of use.
