

# Public Lighting Tariff

## Code 36

## **Tariff for Public Lighting**

The Tariff for **Public Lighting** is mainly applicable to electricity supplies for the purpose of public lighting or other purposes approved by EAC and it is offered to Municipalities or Local Authorities or other Public Organisations.

## **Bi-monthly Public Lighting Tariff (Code 36)**

In accordance to this tariff, electricity will be supplied, daily from half an hour after sunset until half an hour before sunrise.

This tariff provides that the supply of electricity will be used during the whole period, as defined above.

The supply period may be increased from sunset to sunrise, if so requested by the Municipalities/Local Authorities concerned.

The bi-monthly charges, at the basic price of €300/M.T. of fuel cost, for the supply of electricity based on this tariff, are given below:

Energy Charge per unit (kWh)	8,38 cent
Network Charge per unit (kWh)	2,82 cent
Ancillary Services Charge per unit (kWh)	0,66 cent
Meter Reading Charge	€0,98
Supply Charge	€4,64

### **Analysis of Energy Charge**

The Energy Charge per kWh is based on the energy price of the Wholesale Tariff T-W and the basic price of RES purchases for 2021.

Wholesale Tariff T-W	8,56 cent
RES Compulsory purchases	7,11 cent

### **Fuel Adjustment Clause**

In each bi-monthly period, the price of unit (kWh) charged shall be increased or decreased by the value of the Coefficient of Fuel Adjustment currently in force, for every 1 cent increase or decrease in the basic price of €300 per metric tonne of fuel cost, which cost shall be defined by EAC for the bi-monthly period, based on the purchase price of fuel.

- ❖ The contents of the referred Definitions and Notes are applicable and constitute integral part of the tariff.

## DEFINITIONS

**“Bi-monthly Period”**, where the meter readings are taken bi-monthly, means the period from the commencement of the supply to the first routine meter reading or the period from one such reading to the next or the period from one such reading to the termination of the supply on any particular tariff, as the case may be. Where meter readings cannot be taken during the bi-monthly period, the bi-monthly consumption shall be estimated.

**“Cost of fuel per metric tonne”** means the average cost of fuel during the period coinciding with or preceding the period of consumption, as defined by EAC.

**“Unit”** means one kilowatt-hour (kWh).

**“Low Voltage”** means supply of electricity metered at 500 volt or less.

## NOTES

- (1) The Coefficient of Fuel Adjustment is revised on a six-month period basis, according to the Cyprus Energy Regulatory Authority’s Decisions. Its current price is published on EAC’s website.
- (2) For existing customers terminating their supply before the expiration of the normal billing period, as well as for new customers with regard to the first billing period, the Meter Reading and Supply Charges shall be calculated in proportion to the number of days during which the supply was provided.
